

## The READUS-PV checklist for abstracts

Section and topic	Item #	Checklist item	Location where item is reported
Background	1a	<i>State the aim/rationale for performing the study.</i>	
	1b	<i>Specify the adverse event(s) and/or the drug(s) under study, when applicable.</i>	
	1c	<i>Specify the specific population or setting, when applicable.</i>	
Methods	2a	<i>Identify the study as a “disproportionality analysis” and specify the type of data used.</i>	
	2b	<i>Specify the name of the database(s) used and the type of access.</i>	
	2c	<i>Specify the timeframe and geographical region, when applicable.</i>	
	2d	<i>Specify the disproportionality measure(s) used and their statistical significance threshold(s).</i>	
	2e	<i>Specify if a case-by-case analysis is performed.</i>	
Results	3	<i>Report main findings including their precision (e.g., 95% confidence intervals), together with a short summary of the case-by-case analysis.</i>	
Conclusion	4a	<i>Clearly report key conclusions.</i>	
	4b	<i>Acknowledge that the disproportionality analysis is a hypothesis generating or refinement approach.</i>	
	4c	<i>State the implications and clinical relevance of the findings.</i>
